ACADEMIND

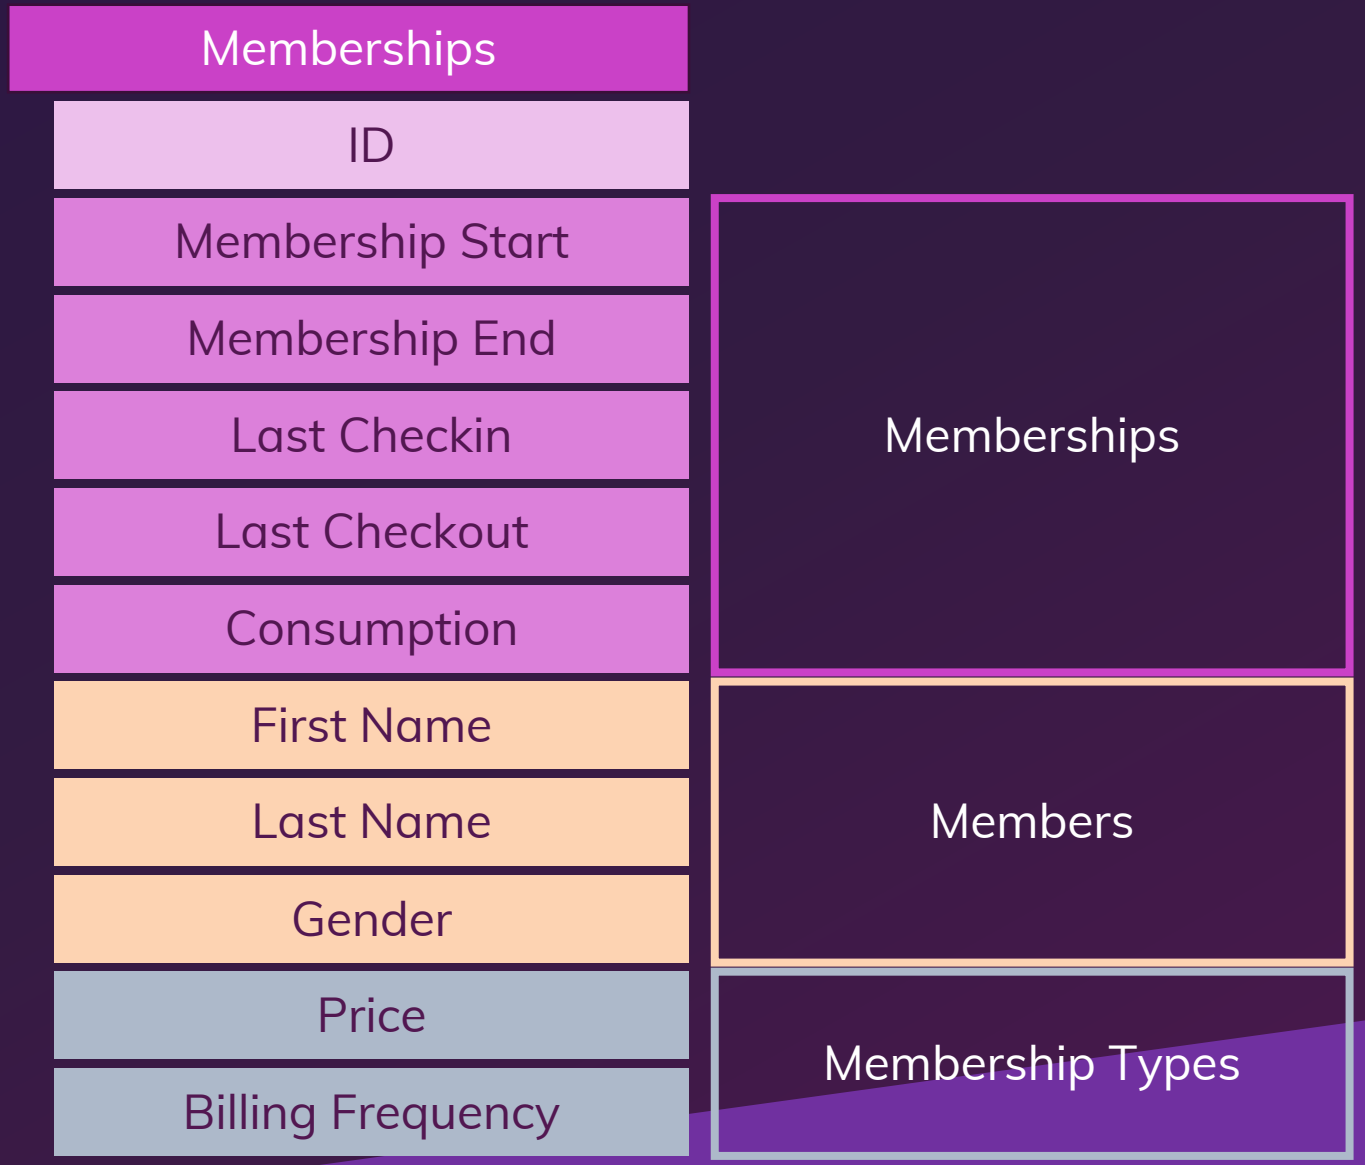
Query Functions & Operators

Exploring More Advanced Query Concepts

Module Content

- Working with Mathematical & String Functions
- Understanding Date Functions and Introducing INTERVAL
- Introducing LIKE, Pattern Matching, Expressions & Transformations

The Module Project



SQL vs Application Level

Application Level	SQL
Error check (whitespace, @, etc) or transformation (uppercase, lowercase)	Data analyst tasks
Direct response to user (error message, redirect to new webpage)	No application focus / no application available
More complex checks / error handling	Direct input via SQL statement to retrieve specific data
